### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an apparatus and/or methods thereof comprising elements being configured as recited in claim.

Specifically, none of the prior art teaches, among other things, the following limitations:

- "[D]etermining whether the input clock signal is a differential clock signal or a single-ended clock signal; automatically generating an output clock signal based on the determination" as required by claims 1, 4 and 20.
- "[A] detector coupled to the second terminal to receive the second clock input signal, wherein the detector is configured to output a clock mode signal as a function of a voltage potential of the second clock signal" as required by claim 9.
- "[A] detector coupled to the second terminal to receive the second clock input signal, wherein the detector is configured to output a clock mode signal as a function of a voltage potential" and "a selector configured to select the first single-ended clock signal or the second single-ended clock signal based upon the clock mode signal" as required by claim 11.
- "[D]etecting whether the signal received at the second input is a constant ground potential signal" and "generating a clock mode signal indicative of the detection" as required by claim 22.
- "[A] clock generator, wherein the clock generator issues one of a single-ended clock signal or a differential clock signal" and "an electronic device including a first terminal and a second input terminal, with the first input terminal coupled to the clock generator, the electronic device to generate a single-ended clock signal of the same frequency as the clock signal" as required by claims 27-29.
- "[C]ompensating includes providing adjustable feedback as a function of whether the received clock signal is the single-ended clock signal or the differential clock signaling circuit in a clock compensator" as required by claim 30.
